Software Tips

Getting Started

When the database software is launched for the first time (or at a new location), a prompt for the path of the CD-ROM appears. Enter a CD-ROM drive letter followed by a colon (e.g. D:) *or* a full network path.

Selecting a ZIP Code

When you launch the database software, it opens the ZIP Code selection window. This window contains a tree in which ZIP Codes for the United States appear hierarchically. Only the first digits for ZIP Codes appear initially. Double-click the first digit of the desired ZIP Code. This will expand the tree so that all combinations of the first three digits of existing ZIP Codes which begin with the first digit upon which you double-clicked appear. For example, if you double-clicked "2" then "200" through "299" will appear under the "2". Next, double-click the first three digits that match the desired ZIP Code. The tree expands to show all ZIP Codes starting with the first three digits on which you double-clicked. Lastly, double-click the ZIP Code of interest or single-click it and then click the OK button to select that ZIP Code.

Once a node has been expanded, a small expansion box appears to its left. The expansion box contains a plus (+) sign to show when the node is collapsed or a minus (-) sign to show when it is expanded. Click the expansion box to expand or collapse the node as appropriate and then click to highlight the ZIP Code of interest.

Searching for a ZIP Code

The ZIP Code selection window can also be used to search for a ZIP Code by a place name (partially or entirely inside a ZIP code) without the actual code. Click on the Search button to open the ZIP Code search window. In the white rectangular box on the left, enter an associated place name (or the first several letters of it). Use lower case letters in the name except where capitalization is appropriate (e.g., first letter of the name). Then click the Find Matches button. Matching ZIP Codes appear in the white box on the right. Click on the ZIP Code of interest and then on the OK button. The ZIP Code selection window reappears with the ZIP Code chosen listed as the selected ZIP Code. To confirm this selection, click on the OK button.

Viewing Data Tables for the Selected Area

Data may appear in a Sector Summary, Sector Detail or ZIP Code Comparison window. Once a ZIP Code is selected, the Sector Summary window appears. This presents summary data for the ZIP Code and totals for all business sectors in the ZIP Code. To view detail data for any of the sectors, click on a sector and then click on either the *Detail* button or the *View|Detail* menu. This will open the Sector Detail window. Multiple Detail windows can be opened at the same time.

To compare data for a sector total or industry across nearby ZIP Codes, click on that sector or industry and then click on either the *Compare* button or the *View|Compare* menu. This will open the ZIP Code Comparison window. Multiple Comparison windows can also be opened at the same time. A Comparison window can be opened from a Detail window and vice-versa.

Printing or Saving a Display

From any of the three types of windows which present data, click on the *Print* or *Save* buttons on the toolbar or select the *File|Print* or *File|Save* menus to print or save the data being displayed in that window.

Copying Data to a File

From any of the three types of windows which present data, click on the *Copy* button on the toolbar or select the *File|Copy* menu to extract records from the data file on the CD-ROM and create subsets. Next, select data items to copy, ZIP Code coverage and file format.

Changing the ZIP Code

Click the Change ZIP Code button on the Summary or Detail windows at any time to choose a new ZIP Code for which to view data.

Changing the Sector or Industry

Click on the upside-down triangle at the right of the long narrow white rectangular box next to the word Sector (Detail window) or Industry (Comparison window) to choose a new sector or industry. The rectangle will expand to show the list of sectors or industries. Click on the industry sector of interest.

Type of File

Summary statistics.

Universe Description

The universe is all business establishments with one or more paid employees. Data are not included for self-employed persons, domestic service workers, railroad employees, agriculture production workers, and most government employees. Data are tabulated by detailed industry based on the revised 1987 Standard Industrial Classification (SIC) designations.

Subject-Matter Description

This file provides data on total number of establishments and number of establishments by employment-size classes by detailed industry. Data on mid-March employment, first quarter payroll, and annual payroll are summarized by ZIP Code without industry detail. This series excludes governmental establishments classified in the covered industries except for liquor stores (SIC 592), wholesale liquor establishments (SIC 518), depository institutions (SIC 60), federal and federally-sponsored credit agencies (SIC 611), and hospitals (SIC 806).

Zip Code Business Patterns 1996

Overview

ZIP Code Business Patterns provides economic data by industry for small geographic areas and is useful for studying the economic activity of small and local areas.

Most of the nation's economic activity is covered in this series. Data are excluded for self-employed persons, domestic service workers, railroad employees, agricultural production workers, most government employees, and employees on ocean-borne vessels or in foreign countries. Data are provided by industry in the following economic divisions: agricultural services, forestry, and fishing; mining; construction; manufacturing; transportation and public utilities; wholesale trade; retail trade; finance, insurance, and real estate; and services. Data are tabulated by industry as defined in the Standard Industrial Classification (SIC) Manual: 1987.

Similar data for 1994 and 1995 are available from Customer Services, Phone: (301) 457-4100. Data for years prior to 1994 are available as special tabulations on a cost-reimbursable basis. For more information, contact the Economic Planning and Coordination Division, Register Analysis Branch, Washington, DC 20233. Phone: (301) 457-2580. E-mail: cbp@census.gov. Visit the County Business Patterns home page at <http://www.census.gov/epcd/cbp/view/cbpview.html> (internet connection required).

Sources of Data

ZIP Code Business Patterns basic data items are extracted from the Standard Statistical Establishment List, a file of all known single and multi-establishment companies maintained and updated by the Bureau of the Census. The annual Company Organization Survey provides individual establishment data for multiestablishment companies. Data for single establishment companies are obtained from various Census Bureau programs, such as the Annual Survey of Manufactures and Current Business Surveys, as well as from administrative records of the Internal Revenue Service and the Social Security Administration.

Comparability with Other Data

County Business Patterns

The County Business Patterns data are extracted from the same sources as the ZIP Code Business Patterns. The County Business Patterns series provides similar data by county on an annual basis.

1992 Economic Censuses

In comparing the employment and payroll shown in this series with economic censuses data, the user should bear in mind that definitional and coverage differences may affect the direct comparison of data items. The definitions are detailed in the documentation of the

various products. The economic censuses present data reported for individual establishments; whereas, ZIP Code Business Patterns are based primarily on administrative records and data reported from current surveys. While every effort is made to resolve significant differences for the same establishment, differences are known to exist.

Data Withheld

In accordance with U.S. Code, Title 13, Section 9, no data are shown that would disclose the operations of an individual employer. However, the number of establishments in an industry classification and the distribution of these establishments by employment-size class are not considered to be disclosures, and so this information may be released even though other information is withheld.

Reliability of Data

All data are tabulated from universe files and are not subject to sampling errors. However, the data are subject to nonsampling errors. Nonsampling errors can be attributed to many sources: inability to identify all cases in the universe; definition and classification difficulties; differences in interpretation of questions; errors in recording or coding the data obtained; and estimation of employers who reported too late to be included in the tabulations and for records with missing or misreported data.

The accuracy of the data is determined by the joint effects of the various nonsampling errors. No direct measurement of these effects has been obtained; however, precautionary steps were taken in all phases of collection, processing, and tabulation to minimize the effects of non-sampling errors.

Glossary of Data Items

Establishments

An establishment is a single physical location at which business is conducted or services or industrial operations are performed. It is not necessarily identical with a company or enterprise, which may consist of one or more establishments. When two or more activities are carried on at a single location under a single ownership, all activities generally are grouped together as a single establishment. The entire establishment is classified on the basis of its major activity and all data are included in that classification.

Administrative and auxiliary establishments primarily manage, administer, service, or support the activities of other establishments of the same company rather than the establishments of other companies or the general public. Data for these establishments are shown separately by industry division.

Establishment-size designations are determined by paid employment in the mid-March pay period. The size group "1 to 4" includes establishments that did not report any paid employees in the mid-March pay period but paid wages to at least one employee at some time during the year. Establishment counts represent the number of locations with paid employees any time during the year. This series excludes governmental establishments except for liquor stores (SIC 592), wholesale liquor establishments (SIC 518), depository institutions (SIC 60), federal and federally-sponsored credit agencies (SIC 611), and hospitals (SIC 806).

Payroll

Total payroll includes all forms of compensation, such as salaries, wages, reported tips, commissions, bonuses, vacation allowances, sick-leave pay, employee contributions to qualified pension plans, and the value of taxable fringe benefits. For corporations, it includes amounts paid to officers and executives; for unincorporated businesses, it does not include profit or other compensation of proprietors or partners. Payroll is reported before deductions for Social Security, income tax, insurance, union dues, etc. First-quarter payroll consists of payroll during the January-to-March quarter.

Mid-March Employment

Paid employment consists of full- and part-time employees, including salaried officers and executives of corporations, who are on the payroll in the pay period including March 12. Included are employees on paid sick leave, holidays, and vacations; not included are proprietors and partners of unincorporated businesses.

Industry and Geography Classifications

The quinquennial economic censuses are the primary source for industry and geography classifications. The annual Company Organization Survey, Annual Survey of Manufactures, Current Business Surveys, and other Census Bureau programs provide regular updates.

Industry Classification

Additional sources for assigning industry classifications are the Social Security Administration, the Internal Revenue Service, and the Bureau of Labor Statistics. These sources provide industry classification information for new businesses and businesses not canvassed in the Census Bureau programs. Establishments without sufficient industry information are tabulated in the "unclassified establishments" group.

Geography Classification

Most ZIP Codes are derived from the physical location address reported in Census Bureau programs. The Internal Revenue Service provides supplemental address information. Those employers without a fixed location or with an unknown ZIP Code are included under a "Unclassified" category indicated by ZIP Code of 99999.

Standard Industrial Classification Code List for ZIP Code Business Patterns 1996

NOTE: Industrial Divisions contain summary data for one or more 4-digit SIC codes and are identified by SIC codes ending in -- (for example, 52-- is the SIC for Retail Trade Division, which represents total for all 4-digit SIC between 5200 and 599\). Industry descriptions ending in * represent partially classified establishments (for example, SIC 5600 represent retail apparel stores that could not be classified to a 4-digit SIC category).
